

## **Expanite, the Danish pioneer within surface hardening of stainless steel and titanium strengthens the organization with the addition of Trine Guldmann as Finance Manager.**

***"Expanite is still experiencing strong growth, and with the addition of Trine Guldmann as Finance Manager, we further strengthen our management team and skills – to support the accelerating international growth plans" says CEO Thomas Abel Sandholdt***

Trine Guldmann is 45 years old and holds a master in Finance and Business Administration. She has previously worked as auditor and in recent years as Finance Manager / CFO in industrial and growth-oriented companies. Her business understanding and strong experience will not only strengthen the company's financial functions, but also the overall management of the company.

Trine Guldmann will be responsible for the global finance function, including Expanites companies in Germany, the United States and Denmark.

### **The Expanite technology**

With the patented process "SuperExpanite", it's possible to increase the surface hardness of stainless steels by up to 10 times, while maintaining or even enhancing corrosion resistance. This method is considered unique since it's suitable for austenitic-, ferritic-, martensitic and duplex stainless steels. Parts can be treated with extremely short lead times—a few days—which is previously unseen within surface hardening of stainless steel.

### **About Expanite**

Expanite was founded in 2010 by leading scientists within surface hardening of steel and stainless steel from the Technical University of Denmark (DTU). Expanite has a combined development and production facility near Copenhagen, Denmark, and operates service centers in the USA and Germany. Read more: [www.expanite.com](http://www.expanite.com)
