## Expanite now ISO 9001:2015 certified

**E**xpanite, the Danish pioneer in the area of surface hardening of stainless steel and titanium has successfully been ISO9001:2015 certified. In parallel with this

shipping and office facilities in all locations - Germany, the USA and Denmark.

“We are very proud of being among the first com-

panies to reach the ISO certification according to the 9001:2015 edition. The recertification to the new standard for all our locations marks an important milestone for Expanite. With the certification, our customers can be confident that Expanite is dedicated and committed to maintaining the same high quality in processes, services and procedures no matter where customers are being served.

**ISO 9001:2008 vs. 9001:2015**

The most noticeable chan-

ge to the standard is its new structure:

- The emphasis on leadership
- The focus on risk management
- Emphasis on objective measurement and change
- Communication and awareness
- Fewer prescriptive requirements

high performance metals. With Expanite's processes for stainless steel, it is possible to increase the material's surface hardness tenfold while at the same time maintaining and even increasing its corrosion resistance.

Expanite has a combined development and production facility near Copenhagen, Denmark, and oper-

certification, Expanite's quality management system now also complies with the CQI-9 standard for heat treatment in the automotive sector.

### Also complies with CQI-9 standard

Expanite originally achieved the ISO 9001:2008 certificate in 2013 for its Danish headquarters but with the recertification to ISO 9001:2015 the scope is extended to cover the production, laboratory,

panies to reach the ISO certification according to the 9001:2015 edition. The recertification to the new standard for all our locations marks an important milestone for Expanite. With the certification, our customers can be confident that Expanite is dedicated and committed to maintaining the same high quality in processes, services and procedures no matter where customers are being served.

“Our motivation to obtain the certifications is driven by a desire to meet customer needs and continue to

go to the standard is its new structure:

- The emphasis on leadership
- The focus on risk management
- Emphasis on objective measurement and change
- Communication and awareness
- Fewer prescriptive requirements

### About Expanite

Expanite offers state-of-the-art solutions for surface hardening of stainless steel, titanium and other

ates service centres in the USA and Germany. Expanite's solutions are flexible and can be tailored to be introduced into a customer's own production line as part of a licensing arrangement.
