

Focusing here & now, and on the future

Welcome to Expanite's first Newsletter of 2018!

Expanite basically flew through 2017; we doubled our business compared to 2016, we became the first in our industry to offer surface hardening of stainless steel in Asia, Europe and North America by opening a facility in China, we increased capacity at our German treatment centre, and recruited talented new team members. Each element, a great achievement in itself, but we couldn't have done this without our most important asset: our customers. And to make sure that we don't lose sight on serving our customers, Expanite also completed its 4th annual customer satisfaction survey by the end of 2017.

In this edition of our newsletter, you can among other things read about the results from the customer satisfaction survey, learn about our newest partnership with the Swiss group Cendres+Métaux SA, as well as read more on Expanite exhibiting at the upcoming Anuga FoodTec trade fair in Cologne and participating in the WhiteWind project with world-leading companies from the wind power industry Vestas and SKF.

Best regards,
Thomas Abel Sandholdt
CEO at Expanite

Hardening of nickel-based alloys, e.g. Monel/Inconel - a new milestone

Inconel 718

Expanite has matured a surface hardening solution for nickel-based alloys, which among other things has reduced wear and galling challenges for customers manufacturing pumps and valves for food, pharma and oil & gas.

Monel/Inconel results

Expanite joins forces with:

Cendres+Métaux SA and Expanite A/S join forces to provide superior stainless steel and titanium watch components to the Swiss watch and jewelry market.

Anuga FoodTec 2018

Visit Expanite at Anuga FoodTec 2018 in Cologne from March 20-23 at our booth in Hal 10,2/C-109.

For free tickets please contact:

mhg@expanite.com

The partnership

New area sales manager at Expanite!

We are pleased to introduce Marc Cizl as Area Sales Manager for the northern/central part of Germany.

Marc has a background within material engineering, and has a long experience with servicing industrial companies on technical challenges. Feel free to contact Marc at mc@expanite.com.

Anuga FoodTec 2018

4th annual customer satisfaction survey

Every year, we ask some of our customers to complete a satisfaction survey, asking them to rate our services and provide feedback.

We are very proud to learn that more than 95% of the respondents would either be extremely or very likely to recommend Expanite to people they know!

Results from survey

Expanite teams up with Vestas, SKF and the Technical University of Denmark in a multi-million euro project funded by the Danish Innovation Fund

Expanite have teamed up with global players from the wind power industry to find new solutions to prevent cracks in stainless steel gears and bearings.

The Whitewind project
